## 46<sup>th</sup> International Mathematical Olympiad

## First Day

Merida, Mexico, Wednesday 13 July 2005

Language: English

**Problem 1.** Six points are chosen on the sides of an equilateral triangle ABC:  $A_1, A_2$  on BC;  $B_1, B_2$  on CA;  $C_1, C_2$  on AB. These points are the vertices of a convex hexagon  $A_1A_2B_1B_2C_1C_2$  with equal side lengths. Prove that the lines  $A_1B_2$ ,  $B_1C_2$  and  $C_1A_2$  are concurrent.

**Problem 2.** Let  $a_1, a_2, \ldots$  be a sequence of integers with infinitely many positive terms and infinitely many negative terms. Suppose that for each positive integer n, the numbers  $a_1, a_2, \ldots, a_n$  leave n different remainders on division by n. Prove that each integer occurs exactly once in the sequence.

**Problem 3.** Let x, y and z be positive real numbers such that  $xyz \ge 1$ . Prove that

$$\frac{x^5-x^2}{x^5+y^2+z^2}+\frac{y^5-y^2}{y^5+z^2+x^2}+\frac{z^5-z^2}{z^5+x^2+y^2}\geq 0.$$

Time allowed: 4 hours 30 minutes

Each problem is worth 7 points

## 46<sup>th</sup> International Mathematical Olympiad

## Second Day

Merida, Mexico, Thursday 14 July 2005

Language: English

**Problem 4.** Consider the sequence  $a_1, a_2, \ldots$  defined by

$$a_n = 2^n + 3^n + 6^n - 1 \quad (n = 1, 2, \ldots).$$

Determine all positive integers that are relatively prime to every term of the sequence.

**Problem 5.** Let ABCD be a given convex quadrilateral with sides BC and AD equal in length and not parallel. Let E and F be interior points of the sides BC and AD respectively such that BE = DF. The lines AC and BD meet at P, the lines BD and EF meet at Q, the lines EF and AC meet at R. Consider all the triangles PQR as E and F vary. Show that the circumcircles of these triangles have a common point other than P.

**Problem 6.** In a mathematical competition 6 problems were posed to the contestants. Each pair of problems was solved by more than  $\frac{2}{5}$  of the contestants. Nobody solved all 6 problems. Show that there were at least 2 contestants who each solved exactly 5 problems.

Time allowed: 4 hours 30 minutes

Each problem is worth 7 points
